Acoustic Information Retrieval for Interactive Sound Rendering in Virtual Environments

Mattia Colombo

18th November, 2024

No.	Page	Revision	Action Taken
1.	ii	Abstract revision: emphasise the research's originality and importance by clearly outlining the pipeline's purpose and concisely summarising the key findings for a stronger impact	Cleared ambiguity between AR and MR. Novel contributions explicitly stated in the abstract. Refactored the writing to improve clarity and overall conciness of the abstract, fitting it into a single page.
